[illegible]

Technical drawing of a mechanical assembly, likely a pump or motor component. The drawing shows a side view of the assembly with dimensions. The top horizontal dimension is 200. The bottom horizontal dimension is 396. The vertical dimension on the right is 52. The drawing includes a cross-section of a cylindrical component at the bottom, with a central vertical axis and a curved surface. The assembly consists of several stacked rectangular blocks, a central vertical shaft, and a horizontal shaft at the top. The drawing is labeled with 'III' and 'II' on the left side, indicating different sections or components.

Technical drawing of the GEX7239N/GEX7485N camera. The drawing includes a front view and a side view. The front view shows a camera body with a lens assembly on the right. Dimensions for the front view include a total width of 342, a lens assembly width of 120, a distance of 100 from the lens to the center of the body, and a distance of 10 from the center to the right edge. The side view shows the camera's profile with a total height of 237...483, a lens diameter of 42, a distance of 60 from the lens to the body, and a distance of 1...4 from the body to the right edge. The camera model is identified as GEX7239N, GEX7485N, and □14.

The drawing shows a side view of the crane's main structure, which consists of a series of horizontal beams supported by vertical columns. A detailed view of the GEX10 11M component is shown on the right, highlighting its internal structure and the GEX10 11M label.
